

# Requirements Analysis [Functional & Non-functional]

Date	14 October 2022
Team ID	PNT2022TMID00409
Project Name	Exploratory Analysis of RainFall Data in India for Agriculture
Maximum Marks	4 Marks

## **Functional Requirements:**

*Following are the functional requirements of the proposed solution.*

FR No.	Functional Requirement [Epic]	Sub-Requirement [Story / Sub-Task]
FR-1	User Registration	Registration via form or email ID and password creation
FR-2	User Confirmation	Confirmation via Email or OTP
FR-3	User Login	Using the registered email ID and password as login credentials
FR-4	Profile Dashboard	Viewing the profile, changing the password and pages navigation
FR-4	Searching	Searching for results and information by place and region
FR-5	Visualization	Visualizing the user-specific data in different forms
FR-6	Prediction	Giving inputs to get the prediction on rainfall using an ML-based model
FR-7	User tracking	Maintaining the history of the user's search operations
FR-8	Feedback & Support	Collecting feedback against the accuracy of the prediction for further improvement and feature inclusion in other modules or functionalities

## Non-functional Requirements:

*Following are the non-functional requirements of the proposed solution.*

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	<ul style="list-style-type: none"><li>▪ The system should administer a quality attribute that assesses how easy <i>user interfaces</i> are to use</li><li>▪ The system doesn't expect any technical prerequisites from the user's side</li></ul>
NFR-2	Security	<ul style="list-style-type: none"><li>▪ User details and login credentials should be safe and secure</li><li>▪ The confirmation of a valid user is required for authentication</li></ul>
NFR-3	Reliability	<ul style="list-style-type: none"><li>▪ Portable and cross-platform independent</li><li>▪ The application should be subjected to an experiment, test, or measuring procedure that yields the same results on repeated trials</li><li>▪ Easy to use and flexible</li></ul>
NFR-4	Performance	<ul style="list-style-type: none"><li>▪ The system should handle the traffic efficiently and service requests while consuming less bandwidth</li><li>▪ The accuracy of the result of a measurement, calculation, or specification should be dependent the datasets</li><li>▪ The page should not take a lot of time to load the contents and display them</li></ul>
NFR-5	Availability	<ul style="list-style-type: none"><li>▪ The version of the application should be available even at the time of maintenance and updating</li><li>▪ The system should run 24 hours a day, 7 days a week <i>[24/7 available]</i></li></ul>
NFR-6	Scalability	<ul style="list-style-type: none"><li>• The application should be in the way of adding new functionalities or modules without affecting the existing functionalities</li><li>• The system should be able to manage numerous users at a time and be less prone to errors</li></ul>
